

# *Mainstreaming active participation of citizens in the Energy Transition*

## Promover comunidades de energia em Portugal

Inês Campos; Guilherme Luz; Esther Marín  
González; Rodrigo Amaro

## Comprender o papel do autoconsumo coletivo/comunidades de energia

Que incentivos podem encorajar a atividade dos *prosumers*/comunidades de energia, garantindo a participação dos cidadãos, de forma inclusiva e transparente, na União da Energia (*Energy Union*)?

# Troca e partilha de conhecimentos

# Desenvolver uma comunidade de interesse

The screenshot shows the PROSEU website's 'PROSUMER COMMUNITY OF INTEREST' page. At the top, there is a navigation menu with 'About', 'News & Events', 'Resources', and 'Living labs'. To the right, it says 'Community of interest' with icons for YouTube, LinkedIn, and Twitter. The main header features the PROSEU logo and the title 'PROSUMER COMMUNITY OF INTEREST'. Below the title, a text block reads: 'On this map you can scroll through initiatives all over Europe that produce and consume their own energy from renewable sources, and who joined PROSEU's Prosumer Community of Interest.' Below this text is a button that says 'Join the community!'. To the right of the text is a photograph of a woman holding colorful pinwheel-like objects. At the bottom of the page is a map of Europe with several location markers: a green circle with '5' in Ireland, a green circle with '1' in London, and a yellow circle with '29' in Paris. A red location pin is also visible in the Baltic region.
